

DARSHAN MADAN WALHER

Data Analytics Analyst

📞 9356384962 @ darshanwalher21@gmail.com 🔗 <https://bit.ly/darshanwalher> 📍 Pune

SUMMARY

I am an aspiring Data Analytics professional pursuing my Bachelor of Technology in Computer Engineering. My passion for data analysis is reflected in my technical skills, including Python, C++, and machine learning. I have successfully developed projects such as an Automated Web Vulnerability Scanner and a Credit Card Fraud Detection System, showcasing my ability to implement effective data solutions

EXPERIENCE

06/2025 - 07/2025

Remote

•

Data Analytics Analyst

Tata Group

Virtual Experience – Tata Group (Forage)

• Performed exploratory data analysis and AI-driven risk profiling to predict delinquency trends

• Delivered data storytelling reports for improving collection and decision strategies

EDUCATION

08/2022

Pune

•

Bachelor of Technology (B.Tech)

JSPM's Jayawantrao Sawant College of Engineering

01/2020 - 05/2022

Pune

•

Higher Secondary Certificate (HSC)

A.M. College

01/2018 - 05/2020

Pune

•

Secondary School Certificate (SSC)

Solia Poonawalla Memorial High School

SKILLS

Gmail	GitHub	Python	Pandas	Numpy	MatplotLib	C/C++	OOP	Flask	HTML	CSS
JavaScript	Random Forest	XGBoost	Git	Streamlit	Microsoft Power BI	MongoDB	Web Scraping			
Kali Linux	Cybersecurity	Scikit-Learn	OWASP	Manual Testing	WhatsApp	Data Mining	EDA			

PROJECTS

Automated Web Vulnerability Scanner

📅 01/2023

📍 Remote

Automated Web Vulnerability Scanner (Cybersecurity & Web Application Security)

• Developed an AI-powered web scanner identifying OWASP Top 10 vulnerabilities (SQLi, XSS, CSRF, RCE) with 95% detection accuracy

• Automated PDF-based vulnerability reports with severity ranking and mitigation steps, cutting manual testing time by 60%

Credit Card Fraud Detection System

📅 01/2023

📍 Remote

Credit Card Fraud Detection System (Financial Security & Explainable AI)

• Trained multiple models achieving 97% F1-score for fraud detection using PCA and SMOTE for data balance

• Implemented SHAP explainability and PDF reporting for transparent decision-making and model accountability

WhatsApp Chat Analyzer

📅 01/2023

📍 Remote

WhatsApp Chat Analyzer (Data Mining & Text Analytics)

• Engineered a chat analysis system processing 5,000+ messages daily with 98% text-cleaning accuracy, extracting emojis, word frequency, and user activity statistics

• Developed interactive Streamlit dashboards and visualization reports using WordCloud and Matplotlib to present engagement trends and conversation insights
